AC Inverter  
General Purpose Drive

# SIEIDrive **ADV100**

## Evolution in AC Drive technology

English

**GEFRAN**

# SIEIDrive ADV100

The GEFRAN range of **ADV100** inverters is specifically designed to give the utmost **flexibility of application** to modern automation systems and ensure ease of use, while guaranteeing advanced control capabilities for all asynchronous motors.

It features an intuitive programming environment to enable immediate motor start-up and system functions to implement control architectures for the most advanced application solutions, all with maximum **energy efficiency**.

The ADV100 is based on a **fully modular** structure with a choice of standard configurations, optional cards and integrated accessories such as EMC filters and mains chokes. All these elements offer real advantages in terms of product optimisation and **savings in panel space and wiring costs**, bringing considerable economic benefits.

## I/O configuration

The ADV100 inverter features a new I/O card, as standard, specially developed for standard application **configuration and to limit costs**; a higher card can be supplied on request for advanced applications:

EXP-IO-D6A4R2-F-ADL card, standard on ADV110 and ADV120:

- 1 enable input (Enable)
- 6 digital inputs (DI)
- 2 differential analog inputs (AI), 1 voltage ( $\pm 10V$ , 11 bit + sign) and 1 voltage/current ( $\pm 10V$ , 11 bit + sign; 0 ... 20 mA, 11 bit).
- 2 analog outputs (AO);  $\pm 10V$ , 11 bit + sign
- 2 relay outputs (RO), single contact

Optional cards on request:

- EXP-IO-D4-ADL: 1DI (Enable) + 2 (Prog.DI) + 2 (RO)
- EXP-IO-D5R3-F-ADL: 1DI (Enable) + 5 (Prog.DI) + 3 (RO)
- EXP-IO-D8R4-ADL: 1DI (Enable) + 8 (Prog. DI) + 4 (RO)
- EXP-IO-D8A4R4-ADL: 1DI (Enable) + 8 (Prog. DI) + 2 (AI) + 2 (AO) + 4 (RO)
- EXP-IO-D12A2R4-ADL: 1DI (Enable) + 8 (Prog. DI) + 4 (DO) + 2 (AI) + 4 (RO)
- EXP-IO-D16R4-ADL: 1DI (Enable) + 12 (Prog. DI) + 4 (DO) + 4 (RO)

## Encoder

The ADV100 interfaces with **incremental digital encoders** (DE) for field-oriented vector control (FOC) of asynchronous motors:

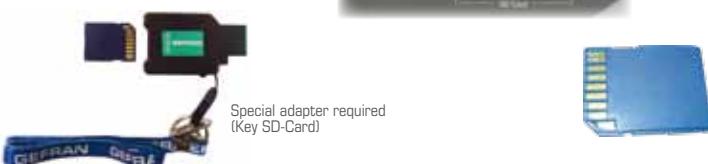

EXP-DE-I1-ADL card, standard on ADV120:

- channels A+ A-, B+ B-, differential line drivers, optoisolated
- management of loss of encoder signals
- TTL and HTL electrical interface.

EXP-DE-I1R1F2-ADL card, optional upon request:

- channels A+ A-, B+ B-, Z+ Z-, differential line drivers, optoisolated
- management of loss of encoder signals
- encoder signal repetition
- TTL and HTL electrical interface.

## SD Card

The SD memory card (standard on ADV120-...-C models) makes **saving and loading data and configurations** with the ADV100 very simple.

## Two self-tuning modes

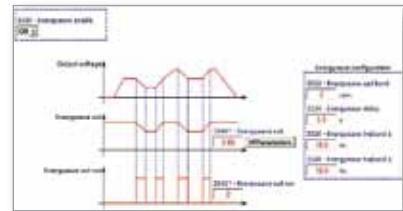

Self-tuning of motor parameters:

- "Reduced" for faster start-up
- "Complete" to obtain maximum efficiency.

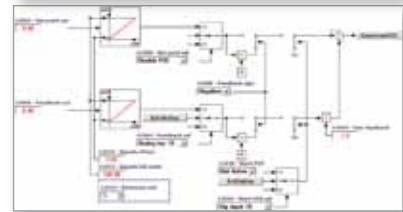

## Energy Saving

The ADV100 has a dedicated function that **decreases** the voltage applied at the motor terminals, and thus **current absorption**, in reduced load conditions.

## PID control

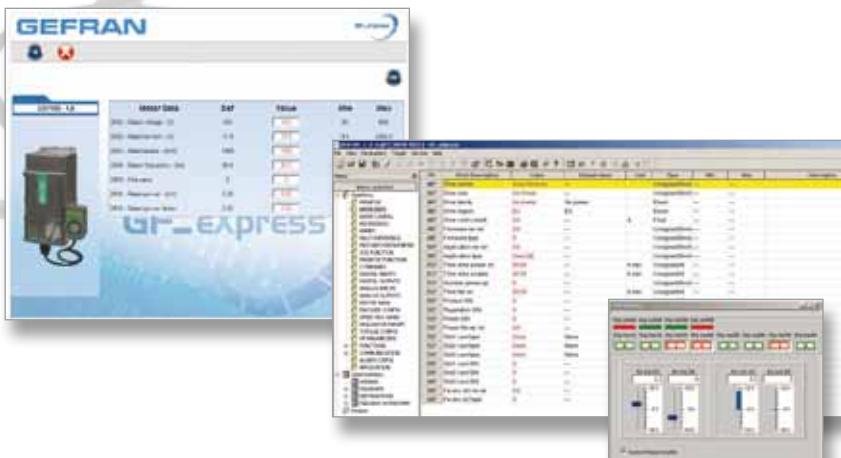

The ADV100 **integrates** a complete, easy-to-program, smart **PID controller**, with value settings in engineering units, leakage function and programmable stand-by.

# General Characteristics

<b>Power supply</b>	3 x 230VAC (-15%) ... 3 x 500VAC (+5%)		
<b>Power ratings</b>	from 4kW to 90kW		
<b>Control and Performance</b>  (*) for standard 4-pole motor	<b>Control mode</b>	<b>Speed control precision (*)</b>	<b>Control range</b>
	Field-oriented vector control with feedback	0.01 % Motor rated speed	1 : 1000
	Open-loop vector control	± 30 % Motor slip rating	1 : 100
	Open-loop V/f control	± 60 % Motor slip rating	1 : 30
<b>Standard supply configuration</b>	<b>ADV100</b>	Neutral version without I/O card and encoder card (on request).	
	<b>ADV110</b>	EXP-IO-D6A4R2-F-ADL card included: 1 enable input (Enable) + 6 digital inputs (DI) + 2 analog inputs (AI) + 2 analog outputs (AO) + 2 relay outputs (RO)	
	<b>ADV120</b>	EXP-IO-D6A4R2-F-ADL card included: 1 enable input (Enable) + 6 digital inputs (DI) + 2 analog inputs (AI) + 2 analog outputs (AO) + 2 relay outputs (RO) + EXP-DE-I1-ADL encoder card (2-channel incremental digital encoder). (*)	
	(*) CANopen / DeviceNet and SD-Card port integrated into -C models.		
<b>Conformity</b>	Climatic conditions Electrical safety: Vibration: EMC: Protection class:	EN 60721-3-3 EN 50178, EN 61800-5-1, UL508C, UL840 pollution level 2 (PD2, OV3) EN 60068-2-6 EN 61800-3 IP20	
<b>Environmental conditions</b>	Ambient temperature: Operation at temperatures of > 50°C (122°F) is not allowed Altitude of installation:	-10°C ... +40°C (14°F ... 104°F), +40°C...+50°C (104°F...122°F) with derating Max 2000 m a.s.l., up to 1000 m without current limitations	
<b>Maximum output frequency</b>	<ul style="list-style-type: none"> <li>• 500Hz (V/f)</li> <li>• 300Hz (Field-oriented vector control with feedback)</li> <li>• 150Hz (Sensorless)</li> </ul>		
<b>Switching frequency</b>	4 kHz constant, 8/4 kHz variable according to temperature and output frequency		
<b>Line choke</b>	<ul style="list-style-type: none"> <li>• Sizes 1040 .. 3220: external optional</li> <li>• Sizes 4300 .. 5900: integrated standard</li> </ul>		
<b>Temperature control</b>	Motor, drive, brake resistor		
<b>Braking unit</b>	<ul style="list-style-type: none"> <li>• Sizes 1040 .. 3220: internal standard</li> <li>• Sizes 4300 .. 5550: internal optional (ADV...-XBX- models.)</li> <li>• Sizes 5750 .. 5900: external optional</li> </ul>		
<b>RS232 serial line</b>	Modbus RTU or Jbus as standard		
<b>Overload</b>	150% In for 60 seconds every 5 minutes 180% In for 0.5 seconds every 5 minutes		
<b>Options</b>	<ul style="list-style-type: none"> <li>• Multilingual programming keypad with LCD screen (5 lines x 20 characters) and memory for 5 parameter sets</li> <li>• Input choke (standard from size 4300)</li> <li>• Output chokes</li> <li>• Braking resistors</li> <li>• Incremental digital encoder feedback card (EXP-DE-I1R1F2-ADL)</li> <li>• I/O expansion cards</li> <li>• CANopen / DeviceNet communication (integrated in ADV120...-C models)</li> <li>• External EMC filter (4...45 kW: C2 Category / 1st Environment / Motor cable length 30m; ≥ 55kW: C3 Category / 2nd Environment / Motor cable length 100m).</li> </ul>		
<b>Certification</b>	   (certification pending)		

## GF-eXpress Programming Software

All drives in the SIEIDrive range and automation devices manufactured by the GEFTRAN group (PLC, HMI, instrumentation, etc.) can be programmed via PC using the **GF-eXpress** configurator. This PC tool enables **complete programming and control of the product**, based on a powerful, user-friendly and intuitive software platform:

- Programming with parameter list or block diagrams
- Integrated oscilloscope
- Programming tool configuration in 5 languages
- Multi-drop network management with up to 32 inverters.
